

THE ONLY
**WATERING
SYSTEM**

DESIGNED SPECIFICALLY
FOR 6, 8, & 12 VOLT
BATTERIES!

**ON-BOARD BATTERY
WATERING SYSTEM**

Several batteries can be filled safely and simultaneously from a single remote position without ever having to touch a battery or remove a cap. Pro-Fill's automatic control valves ensure each cell is closed when the precise level is reached.

PROTECTIVE SHROUD

The Pro-Fill On-Board Battery Watering System is specifically designed for use with "golf car" style batteries commonly found in golf cars, sweepers, scrubbers, RVs, pallet jacks, and small solar systems. Based on the same technology as our industrial Millennium Plus+ valves, our Pro-Fill system is compatible with all of our Millennium water supplies. The Pro-Fill on-board battery watering system works by replacing the battery's existing vent caps with valves that are

interconnected with tubing, allowing the user to fill all cells of the battery from a single remote location. Each valve independently shuts off water flow to the cell when the proper electrolyte level is reached, allowing the batteries to be filled perfectly every time without having to look at the batteries.

FAST

Snap on / Snap off water connections and fast filling turn the often ignored task of maintaining electrolyte level into a simple, enjoyable task... one more likely to get done on a regular basis. Calculate your labor saving using the Cost Justification Worksheet on our website. After installing your Pro-Fill system you will realize other cost benefits including extended battery life, no more corrosion damage to vehicles and floors, as well as a higher vehicle resale value.

SAFE

Fill batteries without ever having to remove the vent covers again. Avoid battery acid burns, ruined clothing and noxious fumes. Each Pro-Fill valve includes built-in flame arrestor (inside the de-gas chamber) to prevent ignition of flammable battery cell gases as they leave the battery. Simply put, Pro-Fill is the safest way to water your batteries.

RELIABLE

When you fill your battery with a Pro-Fill watering system, you know that it's filled to the correct level every time. A properly watered battery last longer and performs better. Overfilling a battery results in loss of acid, while charging with low electrolytes will result in permanent damage to the lead plates. Both will result in loss of capacity and life expectancy.
